

ABHINAV K K

AIML Engineer

☎ +91-9741639342 ✉ abhinavkk742@gmail.com [in linkedin.com/in/abhinav](https://www.linkedin.com/in/abhinav)

Summary

AIML Engineer with a strong foundation in Python, Deep Learning, and Computer Vision. Specializing in engineering AI-powered applications and translating complex data into actionable user experiences. Demonstrated success in training neural networks, implementing NLP solutions, and deploying scalable machine learning models using modern frameworks to improve system efficiency by up to 30%.

Technical Skills

Programming Languages & AI/ML: Python, JavaScript, SQL, Machine Learning, Deep Learning, Neural Networks, NLP, Computer Vision, Generative AI

Tools & Frameworks: TensorFlow, PyTorch, OpenCV, Docker, Azure, Git, Jenkins, Node.js, React

Development & Analytics: Full-Stack Web Development, UI/UX Design, Figma, Tableau, Power BI, RESTful APIs

Core Competencies: Model Development & Deployment, Data Structures & Algorithms, Object-Oriented Programming (OOP), MVVM Architecture, Asynchronous Programming

Experience

InternPe

Feb 2026 – May 2026

AI/ML Engineering Intern

Remote

- Engineered foundational AI/ML architectures during an intensive 12-week program, streamlining data workflows to reduce model preparation time by 15%.
- Designed and validated scalable diagnostic systems, optimizing training paradigms for deployment in future enterprise-level machine learning projects.

Projects

HealthOracle – AI-Powered Health Diagnostic Platform | *Kotlin, Jetpack Compose, TFLite* Dec 2025 – Apr 2026

- **Spearheaded** the development of a full-stack health application, integrating TensorFlow Lite modules to enable high-speed offline predictions under 200ms.
- **Constructed** end-to-end classification features for PIMA-dataset diabetes and skin disease identification, achieving 88% precision via localized mean/scale preprocessing.
- **Integrated** a real-time GPS-based tracker via OpenStreetMap with Room DB storage, ensuring 100% data persistence for background location tracking and interactive home widgets.
- **Architected** a responsive UI using Jetpack Compose and MVVM architecture, successfully handling 4+ concurrent background states without frame drops.

Kalyani Timber – Full-Stack E-Commerce Platform | *MongoDB, Express.js, React, Node.js* Nov 2025 – Feb 2026

- **Deployed** a scalable commercial e-commerce solution tailored to support high-volume retail operations, managing over 500+ active inventory assets.
- **Programmed** automated asset tracking pipelines within the admin ecosystem, enabling live product additions, real-time pricing adjustments, and reducing manual entry time by 40%.
- **Optimized** database queries through a structured RESTful API layer, ensuring 99.9% uptime and secure SSL-certified transactions for the production environment.

AI-powered Music Recommender System | *Python, OpenCV, ML, YouTube API*

Mar 2025 – Jun 2025

- **Formulated** a real-time facial emotion detection system using Python and OpenCV, successfully analyzing user moods with a validated 92% classification accuracy rate.
- **Trained** machine learning models for granular emotion classification utilizing advanced computer vision techniques over a dataset of 5,000+ images.
- **Connected** the YouTube Data API to generate customized music recommendations mapped directly to detected emotions, driving highly personalized user engagement.

- **Invented** an intelligent multimodal tool that converts live voice instructions into high-fidelity images, reducing manual prompt engineering time by 50%.
- **Implemented** Faster Whisper to achieve highly accurate voice-to-text transcription, seamlessly connected with external AI image generation REST APIs for low-latency output.
- **Designed** 15+ comprehensive UI mockups in Figma, conducting interaction flow testing to optimize end-user experience before final deployment.

Education

Bachelor of Technology in Computer Science and Engineering

Aug 2022 – May 2026

Dayananda Sagar University, Bangalore

Current Status: Pursuing

- **Relevant Coursework:** Data Structures, Algorithms, Machine Learning, Deep Learning, Computer Vision, Web Development

Certifications & Awards

-
- **Figma for Designers (Jun 2025):** Achieved certification focusing on user-centered design principles, rapid prototyping, and wireframing best practices.
 - **Linux Programming Foundation Certification (Jan 2018):** Mastered advanced system programming and command-line proficiency crucial for configuring scalable ML environments.
 - **Academic Excellence:** Demonstrated consistent top-tier performance across AI/ML coursework and the successful execution of 4+ practical software implementations.
